

Hospitality that responds faster, assigns the work in real-time, and connects with guests whenever, wherever.

Your guests have gone mobile. **Have you?**

Guests move straight to their room. Phone in hand. Door opens. Stay begins. No keycard. No waiting. Now, every request can move just as smoothly.

With Quore's Canary integration, guest messaging now connects directly to hotel operations—so nothing gets lost between ask and task.

From Ask to Task— In One Step

A guest texts for towels.
Or reports a maintenance issue.

With Canary-Quore integration, your front desk can

- Create a service request or work order instantly
- Sync room, item, and urgency from Quore
- Send tasks directly to the right team
- Front desk and back-of-house can see and share live updates
- When tasks are done, Quore syncs with Canary's dashboard

No retyping. No chasing. Just clear handoffs.

Two Apps to Run it All.

Canary brings the digital experience guests expect

- Mobile check-in and checkout
- Secure mobile keys (Apple & Android)
- Straight-to-room access
- Reduced keycard costs and waste

Quore brings the orchestration teams rely on

- Task management
- Operational workflow
- Real-time updates on task progress
- Tasks arrive with full detail, generating tickets for each unique request

No switching software. No manual follow-up.

Front Desk, Fully Informed

If guests ask for updates

- See status instantly
- Confirm completion timing
- Respond with confidence

Clear updates. Quick responses. Calm guests.

The Result

- Fewer missed requests
- Faster service
- More connected teams

When communication flows, the hotel hums.

Add Quore + Canary

Unite guest communication and operational execution.
